PROFESSIONAL SUMMARY

BCA graduate with hands-on experience as an Information Security Trainee at ESAF Small Finance Bank, coordinating VAPT activities, supporting vulnerability tracking and remediation, Familiar with vulnerability assessment and security testing tools (Nessus, Burp Suite, Metasploit), SIEM (Splunk), threat detection, and incident response concepts. Currently pursuing an MCA and seeking a Security Analyst role to build practical skills in security monitoring, vulnerability management, and risk and compliance.

SKILLS

Technical Skills: Web Application Security, Vulnerability Assessment, SIEM, Threat Detection, Incident Response, Network Security, VAPT, Access Control Review (PIM/PAM), Security Awareness, Regulatory Compliance Reporting, Third-Party Risk Management, Python, HTML, JavaScript

Tools: Splunk (SIEM), Nessus, Burp Suite, Metasploit, Microsoft Excel

Professional Skills: Analytical Thinking, Attention to Detail, Problem-Solving, Documentation, Communication, Teamwork, Time Management, Adaptability

EXPERIENCE

Information Security Trainee | ESAF Small Finance Bank | April 2024 - August 2024

- Coordinated VAPT activities for web applications with internal teams and third-party vendors, supporting vulnerability identification, tracking, and remediation.
- Maintained documentation and trackers for ongoing VAPT findings and compliance submissions.
- Assisted in vendor risk assessments and supported internal audits.
- Assisted in reviewing PIM/PAM access reports to validate user privileges against internal access control policies.
- Assisted in reviewing and submitting regulatory reports (RBI quarterly reports via Daksh and CSK monthly reports), maintaining accuracy and meeting submission deadlines.

EDUCATION

Master of Computer Applications (Distance Mode)

Indira Gandhi National Open University | 2024 - Present

Bachelor of Computer Applications (BCA)

University of Calicut | 2020 - 2023

CERTIFICATIONS

Certified IT Infrastructure Cyber SOC Analyst (CICSA)

RedTeam Hackers Academy | 2023 - 2024

PROJECTS

MCA Final Year Project | Cogni Cook | Python, Flask

- Built a recipe recommendation web app that matches pantry ingredients to recipes using TF-IDF and cosine similarity.
- Implemented secure authentication with hashed passwords, CSRF protection, and rate-limited login attempts to defend against brute-force attacks.
- Applied input validation and safe database query practices to prevent common web vulnerabilities such as SQL injection.
- Developed user-facing features including dietary and difficulty filters, recipe bookmarking, and a responsive interface.

BCA Final Year Project | Rent-a-Cube | Python | Django

- Built a web application for booking and managing workspace reservations using Python and Django.
- Implemented user login and authentication to keep user accounts secure.
- Applied role-based access control to restrict access to features and data based on user roles.
- Followed basic security practices when handling user data to protect stored information.
- Designed the application to stay reliable and easy to use as the number of users and reservations grows.
